Tom Miller / Plant Manager (225) 473-5981

INSPECTION TYPE: ICI PROGRAM INVOLVED: AIR WASTE WATER OTHER _____

INSPECTOR'S OBSERVATIONS: (e.g. AREAS AND EQUIPMENT INSPECTED, PROBLEMS, DEFICIENCIES, REMARKS, VERBAL COMMITMENTS FROM FACILITY REPRESENTATIVES)

Incident Complaint Investigation T-151987

- Yanfu Zhao and I investigated potential Sulfur Trioxide (SO₂) release at DuPont Burnside Sulfuric Acid Plant. Met with T.J. Ozban (EHS Coordinator)
- The facility was in the process of starting back up on Oct 27, 2013 from a month long turnaround. In the process of starting up, they developed a leak by drain valve off the Hot Inter Phase (HIP). Rates were reduced and the leak was fixed on Oct 28, 2013.
- Facility tour was conducted with Daniel Monhollen (Ops Consultant) to see where the leak started on the HIP. No offsite impact due to the leak.

NOTE: The information contained on this form reflects only the preliminary observations of the Inspector(s). It should not be interpreted as a final determination by the Department of Environmental Quality or any of its officers or personnel as to any matter, including, but not limited to, a determination of compliance or lack thereof by the facility operator with any requirements of statutes, regulations or permits. Each day of non-compliance constitutes a separate violation of the regulations and/or the Louisiana Environmental Quality Act.
